SUMMARY

Product designer and front-end engineer with 3+ years designing and shipping user-centered digital products across fintech, Web3, and consumer apps. Pairs a mathematics and education background with hands-on React and Next.js development to close the gap between design and engineering, delivering interfaces that are both rigorously usable and production-ready. Focused on fintech product design, Web3 and on-chain experiences in the Cardano ecosystem, and data-dense dashboards.

CORE SKILLS

Product & UX Design: User research, wireframing, prototyping, usability testing, interaction & motion design, design systems

Front-End Engineering: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, HTML/CSS, responsive development

Tools: Figma, Adobe XD, Photoshop, Illustrator, InDesign, Framer, Git & GitHub

Focus Areas: Fintech, Web3 / blockchain (Cardano), data visualization, edtech, marketplaces

EXPERIENCE

Freelance Product Designer & Front-End Engineer — Independent *2023 – Present*

- Design and ship end-to-end product experiences for early-stage startups across fintech, Web3, and consumer apps — owning the flow from user research and wireframing to high-fidelity UI and production front-end code (React, Next.js, TypeScript, Tailwind).
- Design fintech products such as SabiBank, a personal-finance app featuring budgeting templates, expense tracking, goal setting, and plain-language financial insights tailored to student users.
- Deliver UI/UX and front-end work for Web3 products in the Cardano ecosystem, collaborating with ecosystem organizations including Gimbalabs, Andamio, and Blockrint on developer tooling and on-chain data experiences.
- Built an ADA Handle search-and-visualizer dashboard that turns complex on-chain data into clear, navigable views.

Digital Designer — Filtar.Africa *2022*

- Created cohesive, user-centered visuals across web, social, and marketing channels to strengthen brand identity.
- Partnered with marketing and product teams to align content with engagement goals and maintain brand consistency across touchpoints.
- Produced marketing and product assets using Adobe Creative Suite (Photoshop, Illustrator, InDesign).

Adobe Creative Suite Instructor — Kavit Digital *2019 – 2022*

- Delivered hands-on, project-based training in Photoshop, Illustrator, InDesign, Premiere Pro, and After Effects to learners of varied experience levels.
- Taught industry-standard design principles and practical workflows, adapting instruction to individual learning styles.

SELECTED PROJECTS

- **SabiBank —** Personal-finance app; budgeting, expense tracking, and financial insights. (Design + front end)
- **ADA Handle Search & Visualizer Dashboard —** On-chain data visualization tool for the Cardano ecosystem (TypeScript).
- **WanderSmart —** AI-powered travel planner that generates personalized itineraries from user inputs.
- **GigsGig —** Trust-first gig marketplace for university students.
- **Backup Line —** Business-focused cloud storage experience for modern teams.

EDUCATION & CERTIFICATIONS

B.Ed. Mathematics Education — University of Lagos *2025*

- Recipient, BED Mathematics Program Scholarship for academic performance (2020–2025).

Google UX Design Professional Certificate — Google (2022)

Social Psychology — Wesleyan University / Coursera (2022)

AWARDS & COMMUNITY

- 1st Place, Product Design — GDG Lagos 20 Days Challenge (2024).
- Volunteer designer — GDG Lagos, MLSA Lagos, and ACM SIGCHI Lagos.
